General Ledger

The General Ledger program seamlessly integrates with all of the other accounting modules, including Accounts Receivable, Point of Sale, Inventory, Income and Accounts Payable, all of which automatically post to the general ledger. This program offers the ability to set up the chart of accounts by department and site.

Included is the ability to create set form journal entries for all departments, drill down from any G/L transaction, automatically allocate revenue to several transaction revenue when appropriate, and a host of other G/L level activities.

In addition, the General Ledger program can generate balance sheets, trial balances, budget comparison reports, profit and loss statements, and all other major financial reports.

Reports are available by individual site, department, cost/profit center, or consolidated for all department appropriates. The R&R Report Writer is the system report generator, it means all reports can custom (depend on database structure) to your need.
